Hi Alan,

I was correct that we don't have the technology to simulcast the workshop (or, any board meeting). We do post on the internet the audio recording of these meetings, although it takes some time to prepare that for posting (I think it's usually posted within a week). Let me know if there's anything else I can do for you.

Terry,

It would be for listening purposes only. The active participants will be there in person.

Thanks Terry.

Alan

Hi Alan,

Are you talking about for participating in the discussions and giving a presentation, or for listening to the dialogue? I think probably not, but if I know more about what you are interested in, I can figure out if we could make it happen. We will definitely record the meeting in audio format. Once I hear from you, I can get more info.

Thanks,

Terry

Terry,

Will there be a conference line staff could use to call into the board meeting?

Alan

I forgot to mention: The workshop will be in the Tillamook Room, Building C, 2600 State St., Salem (see attached map). Also, you are invited to join us for a complimentary lunch with the

Board, staff, and other presenters.

Josh,

Please coordinate with NOAA, EPA, and ODFW for who will cover what for how long for the presentations for Topic 2 (see attached Public Agenda and associated Summary and Questions documents), and then get back to us with the approach you will take. These agencies plus DEQ will have a maximum of 40 minutes of presentation time (less time is better to allow more Board discussion), with 20 minutes of Q&A plus discussion for the Board. The Summary and Questions document outlines what info your group needs to cover in Topic 2, knowing that you might not be able to address all Board questions if they are very much down in the weeds. The attached email provides direction of what we are looking for from the presenters.

Please let me know if you have any questions.

Thanks,

Terry

Subject: Board Workshop 23 June

Dear Chris,

Thanks for agreeing to present at the Board of Forestry workshop on June 23, 2014. The workshop is fast approaching, and I have attached the agenda and a summary and questions document, which contains the questions the Board has asked about topics related to riparian protection and the rule analysis. The agenda is full, so we will have a facilitator to keep this workshop moving at a decent pace and maintaining the Q&A at an appropriate level of detail for this workshop.

For the presentations, we are looking for a very high level summary of the science of Forest Practices effects on stream temperature on small and medium fish streams in the Watersheds Research Cooperative (WRC) studies (Hinkle and Alsea; Trask only looks at small non-fish streams). The Board questions should help you focus the presentation, although some of the questions do get down in the weeds, so specifically addressing them may be challenging at a high level. You will have 15 minutes to present followed by 20 minutes of board questions and discussion following all 3 temperature presenters. We recognize this may seem daunting to cover the topic in such a short time, so think of this more as an elevator speech: **start with key conclusions, state very briefly why they are correct, and let the Board know what you have to help them understand your knowledge space.**

The purpose of these presentations is to both answer the Board's questions, and to stimulate

their subsequent discussion and any follow-up questions they may have. With questions the Board asks at the workshop, we request you keep your responses concise and to the point – there is insufficient time to delve into all the details and support of every response.

Please arrive at the Tillamook Room (Building C; see attached map) 30 minutes before your topic (i.e., 8:30 AM), and remain throughout the entire topic in which you are slated to speak (i.e., to 11:15 AM). As this is a public meeting, you are welcome to stay as long as you wish outside of this time window.

If you put together a PowerPoint presentation, **please send that to me by 8 AM on June 19th.** We would like to send the Board a packet of material with brief descriptions of presentations, and thus we would appreciate **your emailing a 250 word abstract on your presentation by 4 PM, June 17th.**

Please confirm your receipt of this email, and let me know if you have any questions.

Thanks,

Terry
